To my friends and the public generally I would reduce my most grateful thanks for the liberal patronage extended to the late firm of R. 4 R., and would simily solicit its continuance, as also an examination of my stock by those who have not heretofore patronized the house.

I am permanently located here, and expect to make friends and customers by fair dealing.

Children sent to my store for anything will be waited up n and the same price charged as if their parents came themselves.

JUST RECEIVED.

A large amortment of Fruitand Scaling Wax, BIRDS AND CAGES.

Sewing Machines Havegained the confidence of all who use them, and have proved one of the most valuable inventions

most valuable inventions of the age. They use a Shuttle, making the Lock Stitch on both sides of the

cloth alike, which assumes be unraveled or pulled out.

They are all made with the highest mechanics skill and all warranted to work well on all kinds of goods, from the lightest fabric to heavy leather. In particular, we would call attention of all to our new family Sewing machine. It has been manufactured expressly for family use, and has met with favor from all. It is so simplified as to render at impossible to get out of order, or derange its operations, indeed it is so simple as to autonish one, that so small a plece of mechanism will sew.

Below we give a description of the differentiatyles of the Weed Patent.

NO. 1. Is a very convenient style which can be worked by hand or foot, on ored its own table. For convenience of shipping and also for large manufactories where it is necessary to place a number of them all. Price §50.

NO. 2. With Walmut or Mahogany Table, either

\$100 and \$110.

NO. 3. Same size as No 2, but runs with a belt and at a higher rate of speed. This kind is well adapted to manufacture ciothing or leather work. This is really the cheapest Machine in the market as there is no work done on a Sewing Machine that it will not do. It is condinently asserted that this Machine runs easier than any machine now in use Price \$100.

Machine runs easier than any machine now in use Machine runs easier than any machine now in use Price \$100.

NO. 4. This Machine has a long arm, to accommodate large work. It runs at a high rate of speed runs easily, and is without a doubt, the best Machine for Tailor's use, ever offered to the public. It is also peculiarly fitted for plantation work, as it is very simple yet substantial and durable, with but little liability to getout of order. Price \$130.

NO. 5. This is a new and cheaper style, and a general favorite for Family, light Leather, and a great variety of work. It has been gotten up with reference to furnishing a strong and durable, yet light and tasty machine, at a less price than either of the above. It runs very easy, rapidly, and is uroacounce? the best machine now in market for the destination of the destination of the land that the light had been gotten up with reference to furnishing a strong and durable, yet light and tasty machine, at a less price than either of the above. It runs very easy, rapidly, and is uroacounce? The long the land that the little is the land that the land that

onounce I the best machine now in market for 100.

No. 5. This is a machine got up on an entirely the principle, different from anything ever before fered to the public, and we considently assert that ramily use it has not an equal. It is very light at taxty, runs very rapidly, is almost noiseless in a operation, and uses a stratumity mismit. It is arranged as to be utterly impossible for it to miss tiches. It has a tension on both sides, and carries large supply of thread on the under spool. The otions are gained by two small cranks that run of those properties holds. The two threads are other under spools and the under spool of the second of the under spool. The otions are gained by two small cranks that run of the under spools are spools. The two threads are other under any other threads are other under any of the second of the under spools. The two threads are other under any other threads are other under any of the second of the under spool of the under spools. The two threads are other under any other threads are other under any other threads are other under the transfer of the under spool. The two threads are other under the under spool of the under spool of the under spool. The other under spool of the for family use thas not an equal. It is very man and tasty, rons very rapidly, is almost noiseless in its operation, and uses a stranger negative. It is so arranged as to be utterly impossible for it omiss stiches. It has a tension on both sides, and carries a large supply of thread on the under spool. The motions are gained by two small cranks that run without perceptible holse. The two threads are worked in such a manner as never to pull both at the same time, and consequently, little flable to break. The seam is very elastic and the thread does not break to washing. It will do coarse work better than anycheap machine now in market, as it uses silk, cotion, or linnen with equal facility. Price \$60 Descriptive Circuiars furnished gratis.
